Edison

By Tham & Toby
Edison is a robot. It can connect with lego. You can scan barcode that has a code in it or you can code on your iPad.

Edison are kind of Lego technic computer from other brand.

Edison is designed from Australia and made in China.

Edison is powered by 4 AAA batteries.

Edison open
That makes the robot check if something happens. Dual drive makes both wheels move.
Event wait allows you to either wait for an event to happen, or just wait.

This makes your code repeat.

Play beep just beeps.

That flashes a light.
